Flags:

```
-h, --help  help for daytona
```

Use "daytona [command] --help" for more information about a command.

Command: code

Starts the workspace in VS Code.

Usage:

```
-h, --help      help for code
-i, --ide string Specify the IDE (e.g., 'vscode' or 'browser')
```

Command: create

Use 'daytona create <GIT_URL>' to instantiate a specific repository or 'daytona create' to select one of your own. Using 'daytona create template' lets you pick from a set of predefined templates. 

Usage:

```
daytona create [flags]
```

Flags:

```
-c, --code      Open the project your default IDE after creating the workspace
-h, --help      help for create
```

Command: daytona

Command: delete

Commands the workspace given by ID to be destroyed: 'daytona delete <WORKSPACE_ID>'. Use 'daytona delete --all' to destroy all workspaces in the current team. 

Usage:

```
daytona delete [flags]
```

Flags:

```
-o, --all      Apply command to all workspaces
```

Command: env

Use 'daytona env' to list environment variables or use 'daytona env <KEY>=<VALUE>' to set them.

Usage:

```
daytona env [flags]
daytona env [command]
```

Available Commands:

```
remove      Removes the environment variable specified by key
```

Flags:

```
-h, --help  help for env
```

Use "daytona env [command] --help" for more information about a command.

Command: help

Help provides help for any command in the application.
Simply type daytona help [path to command] for full details.

Usage:

```
daytona help [command] [flags]
```

Flags:

```
-h, --help  help for help
```

Command: ide

Usage:

```
daytona ide [flags]
```

Flags:

```
-h, --help          help for ide
-n, --name string   Specify IDE by name
```

Command: info

Retrieves the information of workspace given by ID 

Usage:

```
daytona info [flags]
```

Flags:

```
-h, --help  help for info
```

Command: list

Shows a list of workspaces by the current user and team 

Usage:

```
daytona list [flags]
```

Aliases:

```
list, ls
```

Flags:

```
-h, --help  help for list
```

Opens the default browser and redirects to login page

Usage:

```
daytona login [flags]
```

Flags:

```
-h, --help    help for login
```

Command: logout

Logs the current user profile out of the Daytona CLI

Usage:

```
daytona logout [flags]
```

Flags:

```
-h, --help    help for logout
```

Command: pin

Commands the workspace given by ID to become pinned (never gets deleted):
'daytona pin <WORKSPACE_ID>'.

Usage:

```
daytona pin [flags]
```

Flags:

```
-h, --help    help for pin
```

Command: profile

Usage:

```
daytona profile [flags]
daytona profile [command]
```

Available Commands:

```
active      Retrieves the ID of the currently active profile
info        Displays information about the active profile
list        Lists available profiles
new          Creates a new profile
set-name     Updates the name of the active profile to one given by argument
set-url      Updates the base URL of the active profile to one given by argument
use          Updates the active profile to one given by argument
```

Flags:

```
-h, --help  help for profile
```

Use "daytona profile [command] --help" for more information about a command.

Command: share

Commands the workspace given by ID to become shared (grants public access):
'daytona share <WORKSPACE_ID>'. Use 'daytona share --all' to share all workspaces in the current team.

Usage:

```
daytona share [flags]
```

Flags:

```
-o, --all  Apply command to all workspaces
-h, --help help for share
```

Command: ssh

SSH

Usage:

```
-h, --help    help for ssh
```

Command: start

Commands the workspace given by ID to start: 'daytona start <WORKSPACE_ID>'.
Use 'daytona start --all' to start all workspaces in the current team. 

Usage:

```
daytona start [flags]
```

Flags:

```
-o, --all    Apply command to all workspaces
-h, --help   help for start
```

Command: stop

Commands the workspace given by ID to stop: 'daytona stop <WORKSPACE_ID>'. Use
'daytona stop --all' to stop all workspaces in the current team. 

Usage:

```
daytona stop [flags]
```

Flags:

```
-o, --all    Apply command to all workspaces
-h, --help   help for stop
```

Command: team

Display list of available teams to choose from. Use flag '--name' to bypass
prompt. 

Flags:

```
-h, --help          help for team
-n, --name string    Specify team name
```

Command: unpin

Commands the workspace given by ID to become unpinned (will get deleted after being stopped for two weeks): 'daytona unpin <WORKSPACE_ID>'.

Usage:

```
daytona unpin [flags]
```

Flags:

```
-h, --help    help for unpin
```

Command: unshare

Commands the workspace given by ID to become unshared (removes public access): 'daytona unshare <WORKSPACE_ID>'. Use 'daytona unshare --all' to unshare all workspaces in the current team.

Usage:

```
daytona unshare [flags]
```

Flags:

```
-o, --all    Apply command to all workspaces
-h, --help    help for unshare
```

Command: version

Returns the version of your Daytona CLI

```
Flags:
  -h, --help    help for version
```
